Dear Sir or Madam,

Greetings from the International Office of Harbin Institute of Technology (HIT)!

We are pleased to introduce you to the CSC8500 Scholarship Program and invite your partnership in providing opportunities for China's top scholars to contribute to the international vibrancy of your student body while affording the student valuable international exposure.

HIT, founded in 1920, is recognized as a world-class multi-disciplinary research oriented institution and one of China's top nine national universities. HIT's core strengths continue to be scientific research and engineering technology.

Established in 2006 by the Chinese Scholarship Council (CSC), the program is plan to select 8500 outstanding students in 2016 from China's top universities to help launch their studies abroad. The students may qualify for one of two tracks:

Sandwich Track: A PhD candidate enrolled in a Chinese university seeking a brief 6 to 24 month study/research opportunity abroad.

Degree Track: An undergraduate or master's degree student eligible to receive their degree in July, 2016.

The CSC8500 Program provides each student with one international round-trip ticket and living expenses for the duration of their overseas study.
