Dear Sir or Madam,

Greetings from the International Office of Harbin Institute of Technology (HIT)!

We are pleased to introduce you to the CSC Master Scholarship Program and invite your partnership in providing opportunities for China's top students to contribute to the international vibrancy of your student body while affording the student valuable international exposure.

HIT, founded in 1920, is recognized as a world-class multi-disciplinary research oriented institution and one of China's top nine national universities. HIT's core strengths continue to be scientific research and engineering technology.

The program is plan to select 800 outstanding students in 2016 from China's top universities to help launch their studies abroad. The students may qualify for one of two tracks:

Sandwich Track: A Master student enrolled in a Chinese university seeking a brief 3 to 12 month study/research opportunity abroad.

Degree Track: An undergraduate degree student eligible to receive their degree in July, 2016.

The CSC Master Program provides each student with one international round-trip ticket and living expenses for the duration of their overseas study. Tuition fee support is also available.

Prior to March 20 2016, the foreign university must provide the student with a formal letter of admission, or an invitation letter issued by the professor who will receive the student.

Thank you in advance for supporting these deserving students. We trust that you will find the contributions they make to your institution worthy of the investment. Please direct your interest or any questions to Ms. LIU Yang at yliu423@hit.edu.cn.
